

Desktop Analog

Recall every conversation using the power of your PC

XTR Professional Universal Adapter 2.0 is the perfect entry level hardware for desktop recording applications. Although it's our basic hardware model, it has many sophisticated features not available on other recorders.

Unique features include

- A full USB plug and Play recorder that does not tie up the sound card on your PC
- Easy setup wizard for simple installation
- Comes complete with sophisticated XTR desktop software and all necessary leads
- The system incorporates line current detection for reliable start / stop of recording.
- Detects DTMF digits for dialed number detection
- Two flexible inputs for separate local / remote level adjustments
- Built in microphone for room / memo

The Universal 2.0 Adapter can connect directly onto any analog line (including cordless telephones) making a recording log of incoming callers and outgoing dialed calls.

Our unique line and handset connectivity allows digits dialed and accurate start / stop from a telephone line as well as a balanced signal mix (local and remote end) from the handset connection.

Universal 2.0 can also connect to any IP, digital or analog business telephone at the handset curly coed Complete with Xtr desktop software, and installed in minutes, the Universal adapter delivers the best analog desktop connectivity and recoding on the market.

Because talk isn't cheap

Reasons why companies record calls

- Customer service quality monitoring recording calls ensures best practices
- Transaction recording record critical information to ensure accuracy of transactions.
- Compliance monitoring ensure industry regulations are met
- Security alerts record bomb / violence threats and verbal abuse

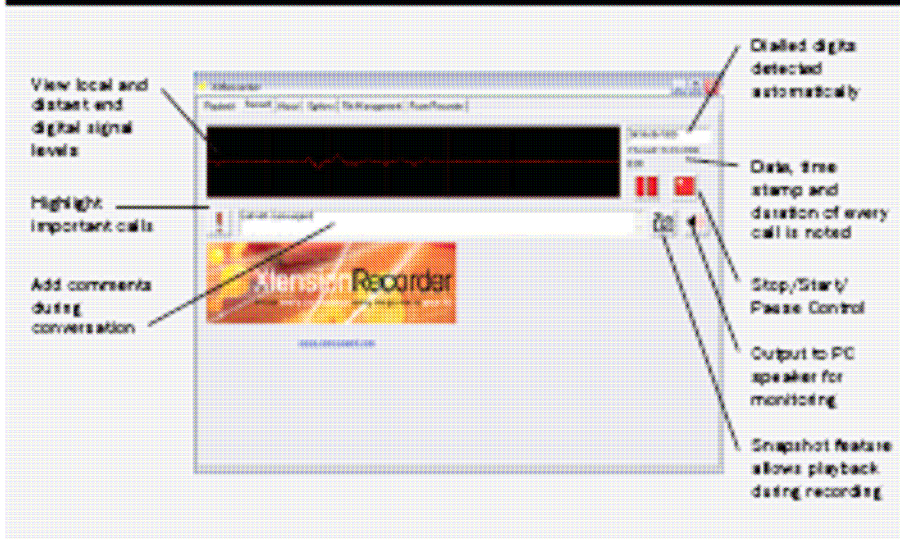

Flexible set up for many applications

1. Record all call or manually select which to record
2. Use compression to save disk space
3. Save calls locally or on a network server for

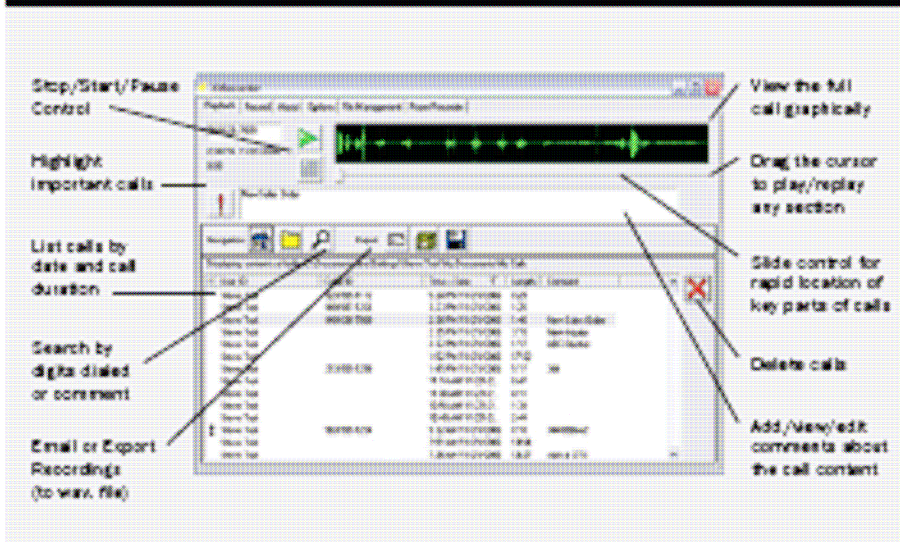

The leader in cost-effective true digital call recording

Great Record Features:

Complete Playback Control:

Message Taking - use Xtension Recorder to record a message instead of writing it down. Email the message to the recipient. It's like a mini Unified Messaging system.

- **Customer Service Desks** - Xtension Recorder is a great training tool. Move it around to different agents to monitor activity from time to time.

- **Operator Positions** - monitor how those important callers are being answered and transferred.

- **Call Centers** - install Xtension Recorder at each desk and record to a central server location for supervisor listening.

- **Conference Calls** - record those important discussions and decisions.

- **Dictation** - Xtension Recorder allows you to dictate directly into your phone and email the recording to an assistant.

Almost every company has a Call Record application that can deliver substantial business benefits. What's yours?
